EXPERIENCE OF STUDYING IBM & SUCCESS ON GRADES AT ACE ACUMEN

By: Komal Chauhan

College Updates

- 1.** Course drop deadline is July 6th! Speak to your advisor for more details.
- 2.** Tuition fee deadline is August 6th, make sure to pay in full to secure your spot!
- 3.** Happy **Canada** Day!

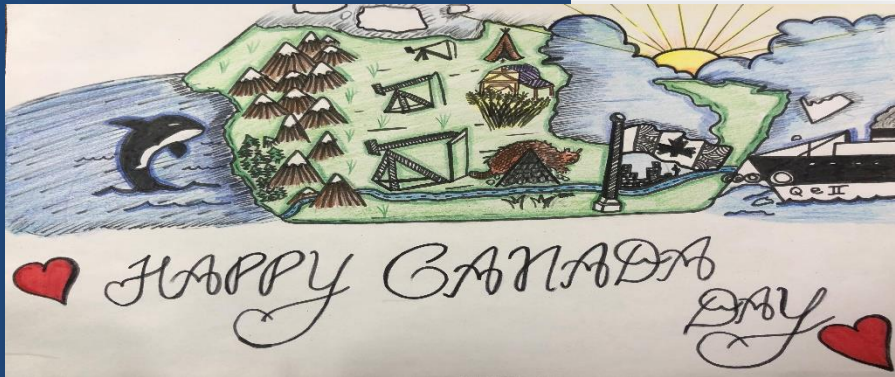

I am Komal Chauhan, a first-semester student of International Business Management as of May 2021. I am excited to be part of **Ace Acumen Academy** and looking forward to learning more about international trade, business ethics, and leadership skills on campus. So, here is my short journey of 5 weeks where I learned new techniques of leadership, managed to do all my assignments on time, got amazing grades and enjoyed fun activities in between arranged by our advisors.

Initially, I was so worried because I was totally new to the **Canadian** education system, but with the help of Ace Acumen faculty and student advisors, it became so easy to complete all my tasks on time. Starting from week 1—which came with an introduction of teachers, subjects and of course, new colleagues—it was very warming and motivated me to look forward to this program. I know you all must be wondering about deadlines of assignments, and how to manage all our studies with other important work but let me share my opinion here on how I managed to do all the assignments on time. So, I used the St. Clair student portal, where we all have access to MS Excel and MS Word documents. I put all my important assignments and class material links there with deadlines, so that no matter how busy I am with all other tasks I need to work on my assignments before the deadline. That was my method of completing assignments and class activity.

Moreover, I also want to share my grade of 100/100 in my Product Search class, where I came to learn how franchises work, including any costs that occur while setting up a franchise. This was extremely inspiring research for me, which boosted my energy to a different level. This was all thanks to my instructor, Professor Mike, who helped us to learn how to do deep research and gain knowledge of applicable terms in our field and motivated us during class every week. Furthermore, as you all know, we are all done with the mid-term exams as well. The process was so smooth and peaceful, and I was able to finish halfway through my first semester without feeling tense or panicked.

Again, I would like to thank all my teachers, student advisors, colleagues, and **Ace Acumen Academy** for providing such an amazing platform where I can become an amazing leader with all the needed business ethics and knowledge. I am looking forward to learning more from such a prestigious institution.

Student Submissions!

Life Like a Star

Life Like a Star

Looking at stars and sky. Everything seems to be a lie. In my life I have many ups and downs. But still don't know how to recognize clowns. Stars are so bright giving me a hope. But to watch them closely I don't have a telescope. My trust and faith on people are on the wane. But I know I just have to be on my own lane. When I look at stars, they seem calm and cold. I feel like they are asking me to be proud and bold. I want to be pure but I am afraid of people. Because I know anytime they can burst my dream bubble. Stars are at a distance of light years, yes! Up so high. Seems like asking me to engulf my fears, if I want to touch the sky. Why people always praise moon, when only stars have their own light. You can't be fed through other's spoon, You need to be self-dependent for your flight. Even in the pitch-dark stars manage to shine. To be like them, me and my soul need to combine. **A poem by Taniya-211**

A Story of Academic Success by Jovanpreet-830

My name is Jovanpreet and I am currently enrolled in the business program at Ace Acumen Academy. I would like to share some of my successes I have had at Ace Acumen, as it has brought me great joy and pride, because of my instructor's amazing teaching skills. This was the first time in my whole life I had achieved a perfect score, 100/100, on an assignment, including a 98 overall on my midterm! This is my greatest lifetime achievement so far, and I would like to thank my amazing teacher, Romelle Maluto. She is extremely helpful and dexterous with her teaching style, which has helped me succeed. Everything I wrote about came from our lessons and what I have learned during class lectures. This has taught me a valuable lesson regarding plagiarism as well, which is: if we learn with dignity, we will achieve the best results.
